

## **Mandalay Resources Corporation Announces Production and Sales Results for the First Quarter of 2019**

TORONTO, ON, April 10, 2019 — Mandalay Resources Corporation ("Mandalay" or the "Company") (TSX: MND, OTCQB: MNDJF) announced today its production and sales results for the first quarter of 2019.

In the first quarter of 2019, Mandalay produced 21,940 saleable ounces of gold equivalent and sold 23,007 ounces of gold equivalent.

Dominic Duffy, President and Chief Executive Officer of Mandalay, commented, "Mandalay's consolidated production was a significant improvement on recent quarters, due in large part to a strong quarter at Björkdal, where trucking and haulage of higher-grade underground material returned to expected levels following the arrival of the entire underground haulage fleet. Björkdal was also positively impacted by the mining of higher-grade underground ore, which is the successful result of our geology team's primary focus of identifying higher-grade ore sources. We expect the higher production levels at Björkdal to remain stable for the remainder of 2019."

Mr. Duffy continued, "While the production was lower at Costerfield compared to the previous quarter, the operation continued with its capital development towards the high-grade Youle lode, scheduled to be producing by year-end. Production was also ramping up on the Brunswick lode, which will be the primary source of Costerfield production over 2019."

Mr. Duffy concluded, "We view the first quarter as an excellent start to 2019. Our performance during the quarter marks the second consecutive quarter of operational improvement, as consolidated production and sales increased by approximately 15% and 25%, respectively, in the first quarter of 2019 versus the fourth quarter of 2018. The major areas of focus over the remainder of 2019 are to advance capital development to the Youle lode at Costerfield and to continue developing operational improvements at Björkdal to lift the processed grade higher. We will also restart our exploration program in the second quarter of 2019, which includes deeper exploration drilling at Costerfield and step-out drilling around the Aurora zone at Björkdal."

### **Saleable production for the three months ended March 31, 2019:**

- In the first quarter of 2019, the Company produced a total of 18,490 ounces of gold and 575 tonnes of antimony, representing a total of 21,940 ounces of gold equivalent, versus 19,303 ounces of gold and 605 tonnes of antimony in the first quarter of 2018, representing a total of 23,172 ounces of gold equivalent.
- Production at Björkdal was 14,385 ounces of gold in the first quarter of 2019, as compared to 12,716 ounces of gold in the first quarter of 2018.
- Production at Costerfield was 4,105 ounces of gold and 575 tonnes of antimony in the first quarter of 2019, versus 6,587 ounces of gold and 605 tonnes of antimony in the first quarter of 2018.

<sup>1</sup> Quarterly gold equivalent ounces ("Au Eq. oz") produced is calculated by multiplying the saleable quantities of gold ("Au") and antimony ("Sb") in the period by the respective average market prices of the commodities in the period, adding the two amounts to get a "total contained value based on market price", and then dividing that total contained value by the average market price of Au in the period. Average Au price in the period is calculated as the average of the daily LME PM fixes in the period, with price on weekend days and holidays taken of the last business day; average Sb price in the period is calculated as the average of the daily average of the high and low Rotterdam warehouse prices for all days in the period, with price on weekend days and holidays taken from the last business day.
